v.37

INDEX TO ILLUSTRATIONS

American Association of Variable Star Observers at Harvard Observatory, October 22, 1928, Plate I and key....Op. 1
American Astronomical Society, New York City, December, 1928, Plate V, and key....Op. 253
Astronomical Cartoon, An....362, 363
Cameras and their operators, Swarthmore College eclipse expedition, May 9, 1929....498
Celestial objects photographed by an ordinary camera....304, 305
Chamberlin, The late Thomas Chrowder, Plate IV....Op. 189
Coma Virgo (diagram)....325
Comet 1929 *a* (Schwassmann-Wachmann), Diagram of orbit of....111
b (Neujmin), Elliptic orbit of....474
Constellation chart....92
Corona as photographed on May 9, 1929, by the Swarthmore eclipse expedition, Plate XIII....Op. 495
of May 9, 1929, The solar, Plate IX....Op. 372
The, taken at Iloilo, P. I., May 9, 1929, by the United States Naval Observatory expedition, Plate X and Plate XI....Op. 431
Coronagraph of the Harvard eclipse expedition, The multiple....372
Dome of 31.5-inch refractor at Potsdam....434
Eclipse, Annular, of November 1, 1929 (diagram)....34
Camp, Swarthmore College, May 9, 1929....496
Total, of May 9, 1929 (diagram)....33
Einstein tower at Potsdam, The....436
Gegenschein and Zodiacal Light illustrations....186
Illuminometer of the Harvard eclipse expedition, The....374
Interference fringes and spectrum lines....398
Jupiter with marking....424
Leavenworth, Francis Preserved, 1858-1928, Plate III....Op. 117
Loess, Photograph of, near Malvern, Iowa....352
Mars, Drawings of, by an amateur....350
G. H. Hamilton, Plate VII....Op. 320
in 1926, Drawings of, Plate XIX....Op. 560
XX....Op. 561
XXI....Op. 568
XXII....Op. 569
XXIII....Op. 576
XXIV....Op. 577
showing changes in Syrtis Major region....247
Max Wolf, director of the observatory at Heidelberg....440
Meteors, Drawings showing paths of....515
Neptune, Apparent path of, among the stars in 1929 (diagram)....40
in Leo....179
The orbit of....136

Observatory at Potsdam, Section of main building of the astrophysical..... 433
grounds at Königstuhl, Heidelberg, Section of 438
Main building of Neubabelsberg 205
Members of staff of Neubabelsberg, and Mrs. Pickering..... 207
of Budapest, Main building of the astrophysical 200
The Perkins, Plate XV .....Op. 553
Occultation of Gamma Virginis 262
reduction formulae, Diagrams illustrating.....
.....123, 124, 125, 126, 127, 128, 130, 131, 132
Occultations, η Leonis, γ Virginis (diagram) 69
for June, 1929, at Amherst, Mass., Diagram of..... 287
Perkins, Professor Hiram Mills, Plate XVI .....Op. 553
Planets, Apparent paths of Mercury and Mars in 1929 (diagram) 36
Venus, Jupiter, Saturn, Uranus, and Neptune in 1929 (diagram) 37
Prominence, Large, photographed on May 9, 1929, Plate XIV .....Op. 502
Reflector, The sixty-one-inch Perkins, Plate XVII .....Op. 556
XVIII .....Op. 557
Refractors, Double 16-inch photographic, at Heidelberg 441
Rhorer, S. Lynn, Plate VI .....Op. 309
Satellite III, Drawing showing transit of, November 8, 1928..... 180
Satellites, Apparent orbits of, at date of opposition (diagrams).....38, 39
Saturn, Deviations in longitude 377
latitude 384
Greenwich longitudes of 386
Recent perturbations of, in declination 283
The orbit of 217
perturbations of 212
Serviss, Garrett P., 1851-1929, Plate VIII .....Op. 365
Spectra of classes M, S, and N, Stellar, Plate XII, with description.....Op. 447
Relationships of the various classes of stellar 456
Spectrographs and interferometers. Swarthmore eclipse expedition, May 9, 1929 500
Spectrum lines, Interference fringes and 398
Sun dial, Angles of 426
Sun, Fine structure on limb of, May 9, 1929, Plate XIV .....Op. 502
Tass and Lassovzsky of the observatory of Budapest 203
Telescope house, An amateur's 248
Terrestrial telescope pier 303
Twin cameras, Swarthmore eclipse expedition, May 9, 1929 503
Venus, Drawings from photographs of, by Latimer J. Wilson, Plate II...Op. 59

GENERAL INDEX

Absorption band in stellar spectra at λ 4200, The, *C. T. Elvey* and *R. S. Zug* 580
Acknowledgment, An 90
Alter, Dinsmore, Application of correlation periodogram to R Lyrae (abstract) 263
Amateur astronomers association meeting 252
The 354, 608
in Buenos Aires 354
Amateur society, An 302
Amateurs, Notes from 112, 178, 247, 301, 350, 424, 545, 606
American Association of Variable Star Observers—
Meeting of the 353
Monthly report of the, *Leon C. Campbell* .....
.....42, 93, 164, 232, 290, 331, 405, 476, 534, 584
American Astronomical Society—
Fortieth meeting of the 9
Forty-first meeting of the 219, 263, 322, 388
Forty-second meeting of the 521, 577
Announcement 429, 608
Reports of observatories, 1927-1928, (Allegheny, Bureau of Standards, Dearborn, Dominion Astrophysical, Dudley, Georgetown College, Goodsell, Leander McCormick, Lick, Sproul) 18-32
Reports of observatories, 1927-1928 (Students', Nacional Argentino, Dominion, Harvard College, La Plata, University of Michigan, Mt. Wilson) 70-89
Reports of observatories, 1927-1928 (Lowell, United States Naval, Princeton University, Smithsonian, Van Vleck, Washburn, Yale, Yerkes)..138-163
Ames, Adelaide, and *Harlow Shapley,* On the transparency of inter-galactic space (abstract) 324
Anomalous dispersion and line intensity, The relation between the degree of, *Charlotte E. Moore* 273
Aries (poem), *Lilian White Spencer* 209
Asteroid designation 353
Asteroids, The spectra of, *N. T. Bobrovnikoff* 263
Astronautics, The committee on 429
Astronomers, A recognition of the work of amateur 90
Astronomical cartoon, An 362
club, The Barnard 115
fraternity of the world, The, Part VI, *David B. Pickering*.... 199
Part VII, *David B. Pickering*... 433
information of practical value 184
outlook, The 59
pilgrimage, An, *Frederick Slocum* 13
prize, The A. Cressy Morrison 609
society of the Pacific, The annual meeting of the, *Maud W. Makemson* 459

Astronomy by radio 115
Groups for the study of 301
Aurora of March 11 .....249, 305
Auroral display 249, 305
Barnard's star, The parallax and the proper motion of, *Carl L. Stearns*..... 14
Barnes, Leland S., A graphic interpretation of the occultation reduction formulae 120
Bartky, Walter, Thomas Chrowder Chamberlin (1843-1928) 189
Barton, Samuel G., An interesting triple star 521
Double stars in the Oxford Astrographic Catalogue (abstract) 263
Beal, William O., Francis Preserved Leavenworth 117
Beals, C. S., On the nature of Wolf-Rayet emission (abstract) 577
Binaries, Notes on spectroscopic, *W. E. Harper* 582
Binary stars, The masses and absolute magnitudes of, *John H. Pitman*..... 9
Bobrovnikoff, N. T., The spectra of asteroids (abstract) 263

Stetson, Harlan T., and *Greenleaf W. Pickard,* On the present sunspot maximum and a correlation with radio reception (abstract) 388
and *Margaret Olmstead,* On the variation of latitude with the moon's position (abstract) 15
A new instrument for laying down lines of position in nautical astronomy (abstract) 15
Eclipse hunting in Malaya in 1929 370
Stewart, J. Q., and *S. A. Korff,* The spectrum of an artificial planet (abstract) 390
Storer, N. Wyman, A photometric study of the continuous spectra of giant and dwarf stars (abstract) 391
Sun dial, A geometrical method for constructing the angles of a..... 426
Sunspot maximum and a correlation with radio reception, On the present, *Harlan T. Stetson* and *Greenleaf W. Pickard* 388
observations, A new series of, and its comparison with the Zurich series, *Issei Yamamoto* 18
at Mount Holyoke College, 1928, Summary of..... 184
Sun-spots, The relation between corona and, *S. A. Mitchell*..... 192
Taurus (poem), *Lilian White Spencer* 610
Telescope house, An amateur's 248
200-inch 307

Terrestrial magnetism in Canada, *C. A. French* 582
telescope pier 302
Tidal friction, A method of estimating, *Walter D. Lambert* 268
Transparency of inter-galactic space, On the, *Harlow Shapley* and *Adelaide Ames* 324
Unsearchable Greatness (poem), *William R. Shields* 463
Uranus, Observations of 606
Variable star observations.....43, 94, 165, 233, 291, 332, 405, 477, 535, 585
observers, Annual report of the American Association of, *Leon C. Campbell* 596
Monthly report of the American Association of, *Leon C. Campbell*, 42, 93, 164, 232, 290, 331, 405, 476, 534, 584
papers 90
stars in the Eta Carinae region, *Dean B. McLaughlin* 269
The discovery of long-period, *Paul W. Merrill* 253
nature of, *Paul W. Merrill* 60
spectroscopic classification of long-period, *Paul W. Merrill* 444
Variables of Class Be, Spectrum, *R. H. Curtiss* 578
Van Biesbroeck, G., Comet notes.....55, 109, 174, 245, 300, 346, 404, 473, 526, 607
van de Kamp, P., and *A. Vyssotsky*, An investigation of the proper motions of faint stars being made at the McCormick observatory (abstract).... 393
Note on the multiple system β Serpentis (abstract) 16
Some results of photographic measurements of the triple visual system Castor A-B-C (abstract) 391
Venus and the moon 286
Observations of, *Latimer J. Wilson* 66
Vyssotsky, A., and *P. van de Kamp*, An investigation of the proper motions of faint stars being made at the McCormick observatory (abstract).... 393
Note on the multiple system β Serpentis (abstract) 16
The number of stars of different spectral classes down to the 11th magnitude (abstract) 394
Wilson, H. C., Phenomena for 1929 32
Wilson, Latimer J., Observations of Venus 66
Wolf-Rayet emission, On the nature of, *C. S. Beals* 577
Wylie, C. C., Fireballs reported to the University of Iowa 604
The meteor of July 25, 1929 514
June 25, 1929 520
Yamamoto, Issei, A new series of sun-spot observations and its comparison with the Zurich series (abstract) 18
Y Cygni, A study of, *R. S. Dugan* 580
Zodiacal Light observations, *W. E. Glanville*..115, 185, 252, 364, 429, 493, 550, 609
The total eclipse of the sun and the 288
Zug, R. S., and *C. T. Elvey*, The absorption band in stellar spectra at λ 4200 (abstract) 580
